To Whom It May Concern,

On behalf of the **UCTEA Chamber of Chemical Engineers – Istanbul Branch**, we are honored to invite you and your esteemed colleagues to the **4th International Process Systems Engineering Workshop**, which will be held from **March 30th to April 1st, 2026**, at the Koç University Research Center for Anatolian Civilizations in **Istanbul, Turkey**.

The workshop will bring together approximately thirty distinguished scientists from leading global universities and members of the **EFCE (European Federation of Chemical Engineering)**. The scientific program will focus on critical themes such as process design and management, and AI-supported production efficiency. As the most comprehensive event in its field for Turkey and the surrounding region, the workshop aims to bridge the gap between scientific research and technical challenges encountered in industrial applications.

This prestigious event is specifically designed for R&D engineers, process managers, designers, and data science teams working across the chemical, pharmaceutical, energy, petrochemical, and manufacturing sectors. It offers participants a unique opportunity to examine global best practices, share experiences with peers, and establish international professional networks.

We would be delighted to welcome the academic staff and researchers from your institution to join this gathering of industry and academia. Please find the detailed scientific program and workshop information attached to this email.

We wish you continued success in your professional endeavors and look forward to welcoming you to Istanbul.

Best regards,

Prof. Dr. Metin Türkay

Chair of the Scientific Committee, The 4th PSE Workshop
